Research & Development Plan

Research & Development Plan

The development of memory chips is going to process scaling, and high proficiency, FATC follows the trend to draw up below R&D plan as described below:

1

For memory high speed, We use PCB layout, copper pillar structure & small bump space assembly techniques to introduced Flip-Chip, and this Flip-Chip technique is used in DDR5 products.

2

Beside continuously used Flip-Chip assembly technique in memory assembly customers, FATC also extends to Logic field.

3

Business Overview & Market Outlook

Business Overview

1

FATC has distributed 2021 cash dividends on August 19, NT\$2.5 per share.

2

EPS in the second quarter is NT\$1.55;
EPS for the first half is NT\$2.59.

3

The 5th plant of FATC is expected to be built in September.

4

The 5th plant will use the flip-chip assembly process and high-speed testing function.

Arrange new generation for DDR5 products.

Market Outlook

1

Affected by high inflation, wars and COVID-19, consumers' purchasing power for electronic products has weakened, and the demand for memory has also decreased.

2

The demand for PCs, phones, servers, and consumer electronics devices is weak, and the memory demand for those products has also slowed down. The visibility of demand is low, but the demand for urgent orders has increased.

The company will flexibly adjust production capacity and shorten production lead time to assist customers in securing orders.
